Free Internet (Dial-Up) Access Instructions for Windows

User Name (ID): _____
Password: _____ (*all in lower case*)

The MDCPS Internet Access account you requested has been established. The MDCPS Office of Information Technology is pleased to be able to facilitate this access to the Internet. It is important that users understand that this free service comes with very limited technical support. If assistance is needed, users should consult with the e-guide at their school site.

Provided by OIT:

1. A user login ID (username), password, and the local (Miami-Dade county) phone number for dial-in access. Technical support is only for problems with the dial-in number. **(OIT cannot answer questions related to your hardware, Internet browser programs.)**

User Agreement:

By establishing an initial connection to the Internet through MDCPS, the user agrees to:

1. Provide their own phone line, computer with a modem, and Internet browser software.
2. Adhere to the MDCPS *Acceptable Use Policy* (<http://www.dadeschools.net/aup.htm>) while using the dial-in service.
3. Utilize the service for no longer than two hours per session.
4. Not share their username and password with others. If your account is not used for more than 100 days, it will be **DELETED**, and can be offered to someone else.

Other notes:

1. If the phone line being used has call waiting, prefix the dial-number with: *70.
2. If you attempt to use the same phone line while connected, service will be disrupted.
3. Since access is through MDCPS, your browser will use the district filtering system.
4. Internet training is available free to MDCPS employees through Internet and Technology Training Services (305-995-3770).

WINDOWS 95/98/ME/2000/XP DIAL-UP CONFIGURATION INSTRUCTIONS

The following instructions will assist you in configuring Dial-Up Networking for Windows. In order to use Dial-Up Networking, the computer must have a working modem that is configured for the Internet.

Configuring Your Connection

1. Click the *Start* menu and drag to *Programs > Accessories > Dial-Up Networking* (in *Windows XP* it is called the *Internet Connection Wizard*).
2. When the *Dial-Up Networking* window appears, double click *Make New Connection*.
3. In the top field, type *MDCPS*.
4. Select your modem if it's not appropriately shown, and click *Configure*.
5. Make sure the maximum speed is set to 57600 or greater. Click *Next*.
6. In the *Telephone number* field, type 305-485-3840 or 1-877-274-1234 for Broward and Palm Beach residents.
7. From the *Country Code* list, select *United States*.
8. Click *Next*.
9. Click *Finish*. You should now see the *MDCPS* icon in the *Dial-Up Networking* folder.
10. Right-mouse click the *MDCPS* icon and drag to *Properties*.
11. Select *Server Type*
12. The *Type of Dial-Up Server* should read something similar to: *PPP: Windows 95/98, Windows NT, Internet* etc.
13. All other options should be unchecked except, *Enable software compression* and *TCP/IP*.
14. Click *OK* until you have exited

Making A Connection

The following instructions outline the connection procedure (i.e., how to dial MDCPS every time you want to make a connection.)

1. Click the *Start* menu and drag to *Programs > Accessories > Dial-Up Networking*. (On some computers, *Communications* may be between *Accessories* and *Dial-up Networking*).
2. Double-click the *MDCPS* icon.
 1. When the *Connect To* window appears, verify that the username and password fields are filled in correctly and click *Connect*.
 2. Your modem should begin to dial.
3. The *Logging onto Network* window verifying your username and password will appear. Wait for a moment until this finishes.
4. Assuming you have entered your username and password correctly, you will be prompted with a window called "Connected to MDCPS" which shows the connection speed and duration of time you are connected to MDCPS. Minimize, but do NOT close this window.
5. You are now connected to MDCPS you can now open your Internet applications (Netscape, Internet Explorer, etc)

Disconnecting

To disconnect from the Internet, close all Internet applications in use. Then right click the *MDCPS* icon in the *Systems Tray* and select *disconnect*.

Free Internet (Dial-Up) Access Instructions for Mac

User Name (ID): _____
Password: _____ (all in lower case)

The MDCPS Internet Access accounts you requested have been established. The MDCPS Office of Information Technology is pleased to be able to facilitate this access to the Internet. It is important that users understand that this free service comes with very limited technical support. If assistance is needed, users should consult with the e-guide at their school site.

Provided by OIT:

1. A user login ID (username), password, and the local (Miami-Dade county) phone number for dial-in access. The username and password is the same for both Internet access and e-mail accounts.

User Agreement:

By establishing an initial connection to the Internet through MDCPS, the user agrees to:

1. Provide their own phone line, computer with a modem, and Internet browser software.
2. Adhere to the MDCPS Acceptable Use Policy (<http://www.dadeschools.net/aup.htm>) while using the dial-in service.
3. Utilize the service for no longer than two hours per session.
4. Not share their username and password with others. If your account is not used for more than 100 days, it will be **DELETED**, and can be offered to someone else.

Other notes:

1. If the phone line being used has call waiting, prefix the dial-number with: *70.
2. If you attempt to use the same phone line while connected, service will be disrupted.
3. Since access is through MDCPS, your browser must use the district filtering proxy.
4. Internet training is available free to MDCPS employees through the Department of Technological Training (305-995-3770).

**MACINTOSH OS TO 7.6 TO 8.0 (OPEN TRANSPORT)
AND OS 8.5 TO 9.0 (APPLE REMOTE ACCESS)
DIAL-UP NETWORKING INSTRUCTIONS**

The following instructions will assist you in configuring Dial-Up Networking for Macintosh, and are only applicable to those users who have Macintosh OS 7.6 – 9.0 installed. In order to use Dial-Up Networking, the first thing you must do is configure your modem to work with Mac OS.

Setting Up Your Modem

1. Open Control Panel and select Modem.
2. On Menu Bar, select File/Configurations.
3. Click Duplicate button.
4. Name the new configuration MDCPS and click OK.
5. Click the Make Active button.
6. Connect via: select the location of your modem. (If your computer has an internal modem, it may not give you a pop-up list.)
7. Modem: select modem type from the pop-up list.
8. Sound: On
9. Dialing: Tone or Pulse (usually tone)
10. Ignore dial tone: leave this box blank
11. Close the window
12. If prompted to save the configuration, choose Save and name the file MDCPS.

Configuring Your Connection

1. Open Control Panel and select TCP/IP.
2. On Menu Bar, select File/Configurations.
3. Click Duplicate.
4. Name the new configuration MDCPS, click OK.
5. Click the Make Active button.
6. Select Edit and the select User Modes.
7. Select Advanced and click OK.
8. Connect via: PPP
9. Configure: Using PPP Server
10. IP address: <will be supplied by server>
11. Subnet Mask: <will be supplied by server>
12. Router address: <will be supplied by server>
13. Enter 168.221.21.150 on the first line of Name server address.
14. In the Implicit Search Path, enter dade.k12.fl.us for the Starting domain name
15. Leave the Ending domain name blank.
16. Enter dade.k12.fl.us Additional Search domains:
17. Click Options and select Active.
18. Check-Load only when needed and click OK.
19. Close the TCP/IP window.
20. If prompted to save the configuration, choose Save and name the file MDCPS.

The next section is dependent upon your specific operating system

For OS 7.6 - 8.0 Only (PPP)

1. Open Control Panel and select PPP.
2. On the Menu Bar, select File/Configurations.
3. Click the Duplicate button.
4. Name the new configuration MDCPS and click OK.
5. Click the Make Active button.
6. Select Registered user. Enter your dial-in username and password.
7. Enter 305-485-3840 for Dade or 1-877-274-1234 for Broward and Palm Beach residents.

PPP/Remote Access Option Button Settings

1. Select the Options button and select Redialing tab.
2. Set Redial-to-Redial main number only.
3. Set Redial #1 to 15 times.
4. Set Time between retries to 5 seconds.
5. Select Connections tab and select Use Verbose Logging.
6. Under Reminders check Flash icon on menu bar while connected and uncheck disconnect if idle for 10 minutes.

Making A Connection

1. Open Control Panel.
2. Open PPP/Remote Access
3. Verify that MDCPS is in the Title Bar (If not, from the Menu Bar Select File/Configurations, click MDCPS and Make Active).
4. Click Connect.

For OS 8.5 - 9.0 Only (Remote Access)

1. Open Control Panel and select Remote Access.
2. On the Menu Bar, select File/Configurations.
3. Click Duplicate button.
4. Name the new configuration MDCPS, and click OK.
5. Click Make Active button.
6. If Setup section (box below Setup) is not displayed, click the arrow next to Setup.
7. Select Registered user. Enter your dial-in username and password.
8. Enter 305-485-3840 for the Number.
7. Select Protocol tab.
8. Check Allow error correction and compression in modem.
9. Check Use TCP header compression.
10. Click OK and close PPP/Remote Access.
11. If prompted to save the changes, Save it and name the configuration MDCPS.
